

Camden Conservatories & Sunrooms

Conservatories and Sunrooms are part of Camden's extensive range of quality products that includes PVCu windows, doors and sealed glass units.

Each product range is crafted to the highest standards using only the toughest, durable materials and advanced techniques throughout the manufacturing process.

All products are available in a range of matching foiled colours, allowing home owners to coordinate the full exterior of their home. At Camden we design products to all specifications and sizes, and manufacture to only the highest quality and safety standards.

Glazing Options

A range of glazing options are available for enhanced energy efficiency and climate control. To further enhance the performance of the conservatory please select a specialist glass, for example: solar control, tinted or self cleaning glass.

Colour Options

Camden offers a range of popular foil laminate colours to enhance the appearance of any conservatory. Conservatories can be coloured on both the outside and inside if requires

Customers can choose from classic white or a number of grain-effect foil laminated including: **Oak, Rosewood, Mahogany, Black and Cream.**

Oak

Rosewood

Mahogany

Cream

Black

Camden Conservatories & Sunrooms

Conservatory Styles

Victorian

One of our most popular styles. A classic, traditional appearance which is suitable for all house types.

The Victorian is curved in style and is available with three or five facet (*main windows*) with a bay front.

Georgian

Flat fronted in style and rectangular or square in shape. This provides a more authentic "room-shape" style and offers more space.

The Georgian features a roof which slopes back to the centre, making this style a contemporary alternative to the Victorian.

Gable

Similar to the Georgian style with the extra benefits of a high roof. The front section of the Gable roof sits vertically instead of sloping back, creating extra height.

This conservatory style is ideal for creating a substantial extension to your home.

Lean-To

Versatile and contemporary in style. The roof can be pitched to different heights based on the shape and size of your home.

This style is ideal for creating extra space and allowing the maximum amount of light into a room. Similar to Mediterranean Sunroom style.

Other Styles Available:

P-Shape

T-Shape

Lantern

Sunrooms

As an alternative to a full conservatory, sunrooms can provide the ideal solution. Using frames and glass manufactured by Camden, homeowners can enjoy the benefits extra space and additional light.

Frames and glass for sunrooms are manufactured to all specifications and tailored to suit the style of your home. Please contact your sales representative for further information.
